

## Assessment

Pre-teach vocabulary: cultural, bilingual and successful.

Instruction: The students will be given a worksheet that have the following three paragraphs. The students must circle the right geometric shapes to identify the main idea of the paragraphs.

Passage 1

To increase your understanding of the socio-cultural effects of World War II, you will write an in-depth research paper. This paper will include a first-person interview and should also involve at least three GOOD outside sources. You first need to choose a specific topic for your project.

Passage 2

It's better and easier to become bilingual when you are younger. When you are a child, your brain is like a sponge absorbing information quickly. However, learning a second or even third language at any age is good brain exercise. Being bilingual boosts your memory and listening skills.

Passage 3 (written myself)

Congratulations on your new adventure! I am so happy that you get to study in Finland. I love it there. I'm sure you'll have a wonderful time. I'd like to give you some advice on how to become a successful student.

ER CENTRAL LEVEL 10 (Ignoring cultural, bilingual, successful)
